4 oz

Bag Crafted from  
Compostable Materials

Our film is made of plant-based materials

The film is at-home compostable and can be used to grow new plants as part of our circular commitment to the world

NatureFlex™ films are derived from wood pulp sourced from certified responsibly managed plantations. They are also certified for home composting by TÜV Austria, while meeting all standards for EN13432 (and international equivalents such as ASTM D6400) for industrial composting

Printed with certified Home Compostable non-toxic ink

## What is the environmental impact of the bag?

Our packaging will break down alongside food scraps and yard trimmings into natural components that generate compost material

**NO  
COMPOST  
BIN NEEDED**

*Our film degrades  
when thrown away  
into any receptacle*
